### FEUMAT Extraction- and Filling Device „Hurricane Trolley“

Item no.: 9011

1. Powerful suction unit, made of solid PP, with integrated on/off switch
2. Vacuum gauge
3. Filter cleaning flap guarantees fast and complete cleaning of hose filters
4. Stainless steel filter plate with seven coated, maintenance free hose filter hoses
5. 1.4301 Stainless steel silo-/filter container with tangential suction connection NW 38. All other metal parts with solid high quality powder coating.
6. Sight window for level control
7. FEUMAT quick coupler system, suitable for all inner and outer threads of all common brands and types of fire extinguishers (tailor-made versions upon request. Thus guarantee of working with closed system and absolute dust freeness.
8. Free moving extraction and filling unit, suspended on an industrial rubber band, with three points allowing height adjustment to individual requirements and needs.
9. This construction principle guarantees easy access as well as easy installation and disconnection of the extinguisher under the suction and refill unit.
10. 2 large wheels on back side for easy manoeuvrability
11. 2 front wheels with brakes
12. rubber plate
13. bed plate for installation into raised roof service vans available

#### Technical Data:

- total weight including trolley: 65,5 kg
- total weight including bed plate: 42,6 kg
- Dimensions (H/W/D): 170-200cm/55cm/65cm
- Motor: 1,2 kW; 230 V / 50 Hz
- Vacuum: max. 2200 mbar
- Noise: 1m distance 78 Db.
