clean work!

Product description Data sheet

FEUMAT disposal and silo container

Item no.: 9012

1. 4 eyes for height adjustment
2. Viewing window for level control
3. Silo container made of stainless steel 1.4301 with suction connection NW 38. In- and outlet
4. Optional with FEUMAT coupling system, suitable for all female and male threads of all common types of fire extinguishers (custom make possible). This guarantees a closed system for absolutely dust-free extraction and filling.
5. 2" stop valve

Optimal as intermediate-, collecting- or disposal container for extinguisher powder for extraction into barrels or Big-Bags.

Picture: in combination FEUMAT Set I, extraction directly from the fire extinguisher into the FEUMAT disposal container.

Technical data:

- total weight: 16,42 kg
- dimensions (h/diam): 80 cm/60 cm
- filling capacity: 75 kg extinguisher powder

technical modifications reserved without prior notice
