

Set III: FEUMAT installation set for service vans Type: "Tornado Slide out"

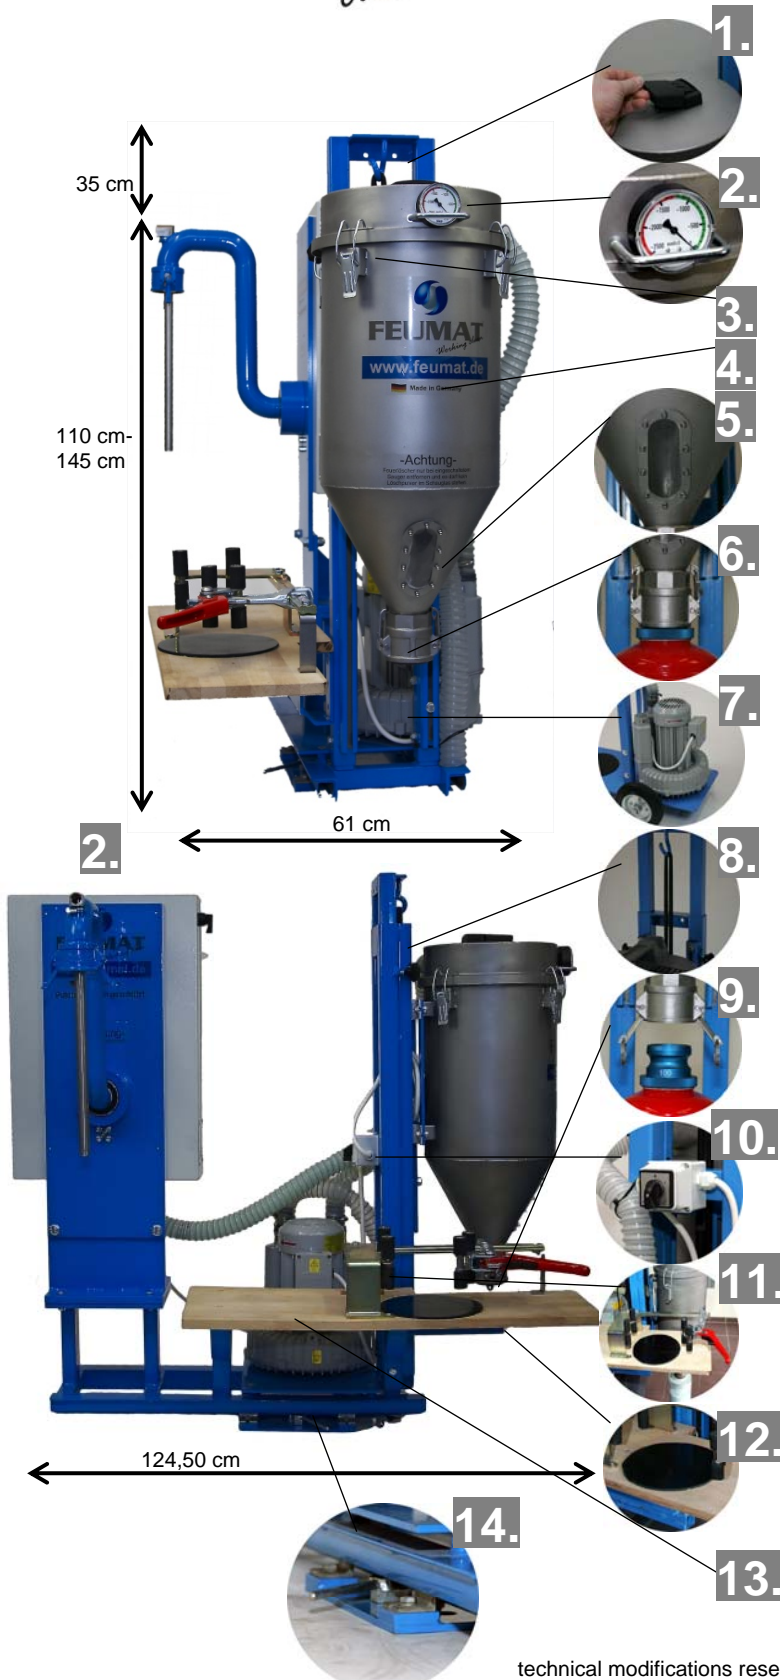

Made in Germany

Set III: FEUMAT installation set for service vans, Type: "Tornado Slide out"

Item no.: 9050

1. Filter cleaning flap for fast and residue-free cleaning of filter hoses
2. Vacuum gauge
3. Stainless steel filter plate with 3 Teflon coated filter hoses
4. Silo/filter container made of stainless steel 1.4301 with tangential suction connection NW 38. All other metal parts are powder coated.
5. Viewing window for level control
6. FEUMAT coupling system, suitable for all female and male threads of all common types of fire extinguishers (custom make possible). This guarantees a closed system for absolutely dust-free extraction and filling.
7. Side channel blower 0,75KW 230V 6,0A
8. Mobile extraction and filling device, with 3 options for individual adjustment of working height
9. Easily accessible connection and removal of fire extinguishers from the extraction and filling device
10. On/off switch of the side channel blower
11. Holding clamp for fire extinguishers of up to 12kg
12. Workbench
13. Rubber pad
14. Easy to move on rail system with bearings, incl. bed plate and one-hand lock.

Technical data:

- total weight: 125,85 kg
- dimensions (h/w/d): variable 110-145cm/ 61cm/124,5cm
- Motor : 0,95 kW, 230 V/ 50 Hz, 6,0 A
- Vacuum max.: 3200 mbar
- Noise: 1m distance 73 Db
