

FEUMAT extraction and filling device "Tornado Trolley"

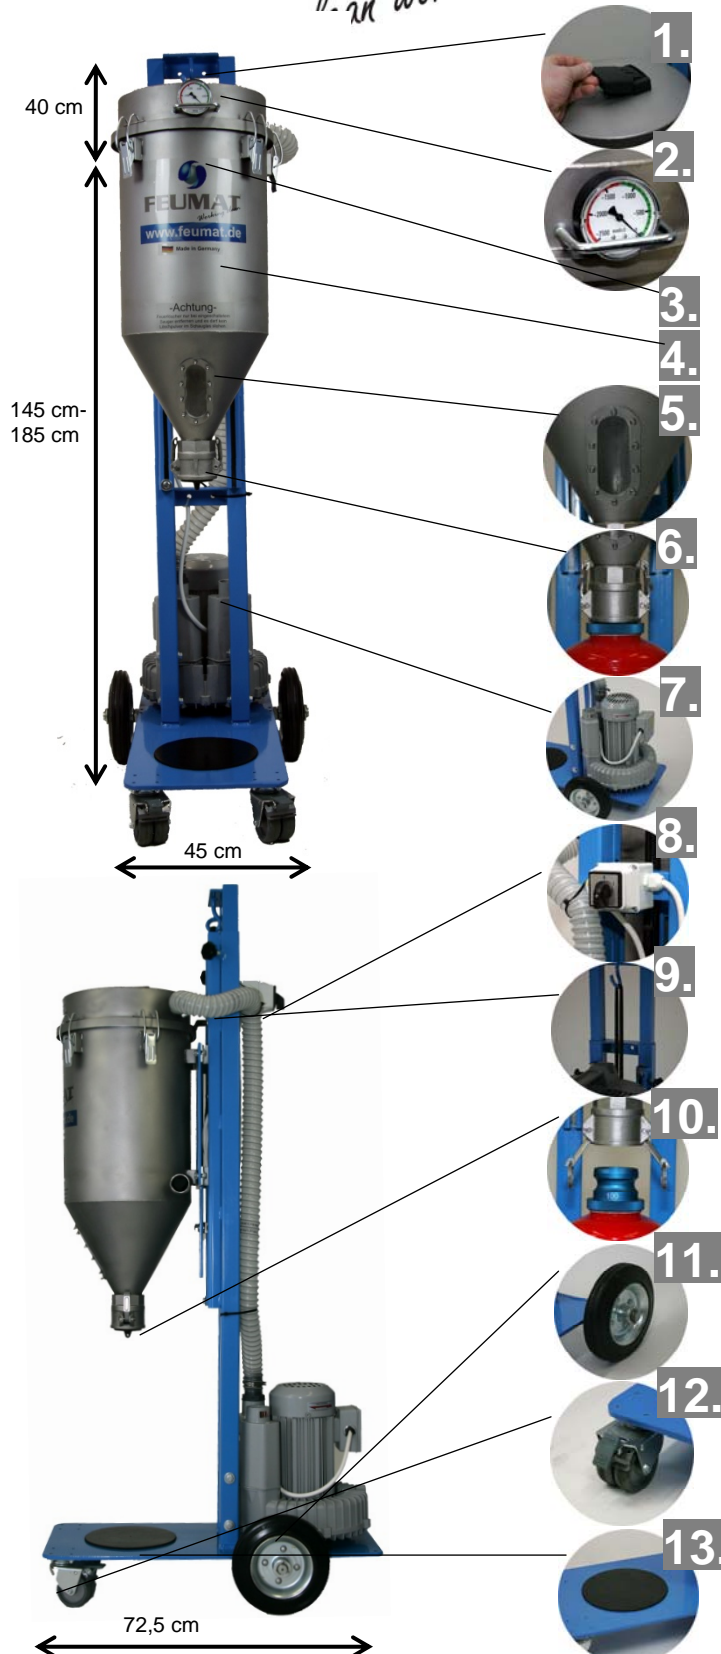

Made in Germany

FEUMAT extraction and filling device "Tornado Trolley"

Item no.: 9041

1. Manual flap for fast and residue-free filter cleaning
2. Vacuum gauge for control of the vacuum
3. Stainless steel filter plate with 3 maintenance-free coated filter hoses
4. Silo/filter container made of stainless steel 1.4301, with tangential suction connection NW 38; all other metal parts powder coated.
5. Viewing window for level control
6. FEUMAT coupling system, suitable for all female and male threads of all common types of fire extinguishers (custom make possible) guaranteeing a closed system for absolutely dust free extraction and filling.
7. Side channel blower 0,75 KW, 230V, 6,0A
8. On/off-switch
9. Mobile extraction and filling device, incl. 3 options for individual adjustment of the working height
10. Thus easily accessible connection and removing of the fire extinguishers to and from the extraction and filling device
11. 2 large rear wheels
12. 2 lockable and brakable front wheels
13. Rubber pad

Mounting frame for fixed installation (e.g. vehicle installation)

Item no. : 9042.001

Technical data:

- total weight: 65,5 kg
- total weight with mounting frame: 42,6 kg
- dimensions (h/w/d): 145-185cm/45cm/72,5cm
- Motor : 0,95 kW, 230 V/ 50 Hz, 6,0 A
- Vacuum max.: 3200 mbar
- Noise: 1m distance 73 Db
